Assistant Professor,
Department of Political Science, Bijni College

Objectives of the Workshop

The objective of this workshop is to enrich the research culture and academic writing practices of students and young researchers by providing systematic training on research paper writing. Academic research is integral to higher educational institutions, and the ability to communicate ideas with clarity, structure and originality are foundational to the scholarly growth. With increasing emphasis on research and publication in the present academic environment, the need for acquiring effective writing skills has become more significant. English Forum, an Internal Body of the Department of English, Bijni College, is proud to organise a *State-Level Workshop on “The Skills of Research Paper Writing”* on **16th September 2025** to address this crucial academic requirement.

This workshop focuses on the essential skills of writing an Academic Research paper, including the selection of a suitable topic, structuring and formatting a paper, mastering academic style, and adopting proper referencing techniques such as MLA, APA, and Chicago. It further aims to raise awareness about plagiarism and provides training on the correct use of referencing tools to ensure originality and ethical scholarship. By integrating practical sessions, interactive discussions, and expert guidance, the program aspires to build confidence among participants, encouraging them to write with accuracy, coherence, and critical insight. The ultimate aim of the workshop is not only to enhance technical writing skills but also to cultivate a research-oriented mindset that will support academic excellence, professional development, and long-term contributions to knowledge creation
