Faculty of Biotechnology
Bodoland University, Assam

Concept Note

Research is the buzzword in recent era that thrives on creating and validating new knowledge in an unprecedented manner. In every aspect of living experiences and knowledge creation "Research" has become inevitable and inalienable. Institutions of higher education in India are facing challenges in evolving and coping with both global and local expectations. To keep pace with the philosophical and technological changes all around and nurturing and sustaining quality research, Research Methodology holds an unassailable position. Research methods are means of observing, hypothesizing, searching, arranging, analyzing and providing the evidence to examine ideas that helps in enhancing the existing body of knowledge in a scientific and systematic manner. The salient objective of this international webinar is to discuss and disseminate the evolving methodology for use of UG, PG and Research Scholars in a most credible manner. The programme intends to orient the participants with emerging issues and equip them with qualitative tools of research and also to provide operating knowledge of statistical tools and software.

Sub Theme

- Theoretical framework in Research
- Designing research (Quantitative and Qualitative)
